Did you just buy your new apartment, and still wondering how are you going to finish it so you can move in? With our new website, finishing your apartment and furnishing it has become very easy.

We walk you step by step from electricity and lightings, plumbing works, painting walls etc. till furnishing and decorating it and adding final touches.

## Finishing Steps

The user can walk step by step beginning with Electricity works and lightings then plumbing works, Painting works, floor and ceramics, doors and finally furnishing and decorating. He can also choose a certain section. Through each section, the user can choose the workers, and the place he wishes to buy the materials from and purchase items online.

## Profile creating

Users should create an account on our website. This gives them access to all the sections. All workers and places have contact information to ease communication between them and the user through our website. They can rate and write/read reviews about the workers and places they deal with. They can filter the workers and places according to ratings and budget.

## Other services

Other options include allowing the users to create schedules to help them remember workers' appointments and to arrange payments. Reminders are sent to the user when an upcoming appointment with a worker or a payment time is coming up. The user can search for a certain item and the result will display all the places selling this item. He can also search for workers by name or by location.
